

DS62

DS62

Flexibility and ease of use have been designed into the DS62

Ideally suited to a small/medium size department, it will make light work of your daily, weekly and monthly mailings. With up to 3 input trays it has the flexibility to handle all of your normal financial and office documents, it can even insert business reply envelopes and product cards.

The DS62's Flexi Feeders handle just about any insert size or type, giving endless mailing opportunities. You can even insert stapled sets.

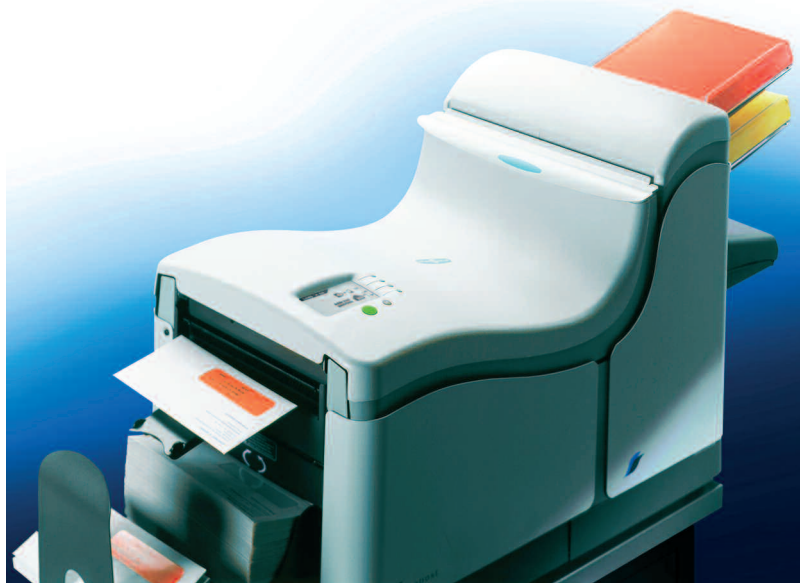

For those small daily runs the DS62 can be instantly up and running using the 'LOAD & GO' function, yet can still process your larger weekly and monthly jobs at speeds up to 2,200 items per hour. Each feeder tray can hold up to 325 documents and for bigger runs these can be linked to give you the ability to feed 650 documents without refilling.

Inserting several sheets into one envelope can be a regular occurrence especially when it comes to monthly statement runs. That's why the DS62 has been designed to take up to 3 sheets automatically and 5 sheets semi automatically from one input tray and insert them into the same envelope.

We know how sensitive some of the documents you send out can be, so the thickness of every document is measured as it passes through the feeders to ensure each envelope contains only the correct documents.

The user-friendly display is easy to use and simple to operate, with the ability to pre-program up to 9 jobs there is no need for complicated set up routines.

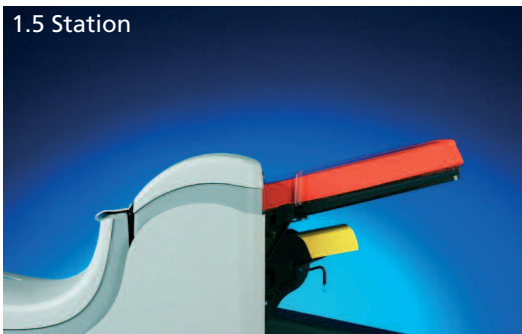

The DS62 has continuous and individual job and batch counters giving you accurate totals of items processed.

Machine Specifications

Feeders	Up to 2 Document feeders and 1 Insert feeder
Feeder Capacity	Document Feeders: 325 sheets 80 gm2 per feeder Insert Feeder: 45 BRE's Or 325 sheets 80 gm2 Envelope Feeder: 150
Speed	Up to 2,200 filled envelopes per hour
Operation	Office environment with non-specialist operators 9 programmable job memory & "LOAD 'N GO"
Document separation & detection	All feeders have automatic document separation and double document detection
Fold Types	Single fold Letter fold (C & Z) Parallel fold
Folding Capacity	Up to 5 sheets including stapled sets
Document Sizes & Weights	Width: 130 mm to 230 mm Height: 90* mm to 356 mm Weight: 60 gm2 to 250 gm2
	<small>* Upper feeder restricted to 115 mm to 356 mm</small>
Insert Sizes & Weights	Width: 130 mm to 230 mm Height: 90 mm to 162 mm Weight: 80 gm2 to 250 gm2 Thickness: Up to 1 mm
Optical Mark Recognition	Optional OMR (2 Station machine only) Up to 5 sheets Simple Collate~Insert Mark* <small>* N.B. No security check capability available</small>
Envelopes	Width: 160 mm to 248 mm Height: 90 mm to 162 mm
Machine Characteristics	Length: 1200 mm Width: 420 mm Height: 520 mm (2 Stations) Weight: 75 Kg
Safety Specifications	UL, CE, FCC
